3. KUMAR RAUNAK RAJ   (12215847)

OUR HOME PAGE

- TURF PARADISE is our restaurant name.

- About us, Contact us, Menu, Feedback, Login sections can access through home page (by using anchor tag <a>)

- We add photos through img src tag

- Heading Tag is used most

- Centre tag is also used for aligning headings and photos.

SOME SPECIAL FEATURES OF HOME PAGE

- In our special dishes section when mouse pointer on any dish that particular dish highlights by zoom (by using css .zoom)

```
.zoom{transition: transform .2s;}
.zoom:hover{transform: scale(1.5);}
.links{border-radius:10px;}
```

- For placing order there is ORDER NOW button on main picture it will redirect to order page.(using anchor tag <a>)
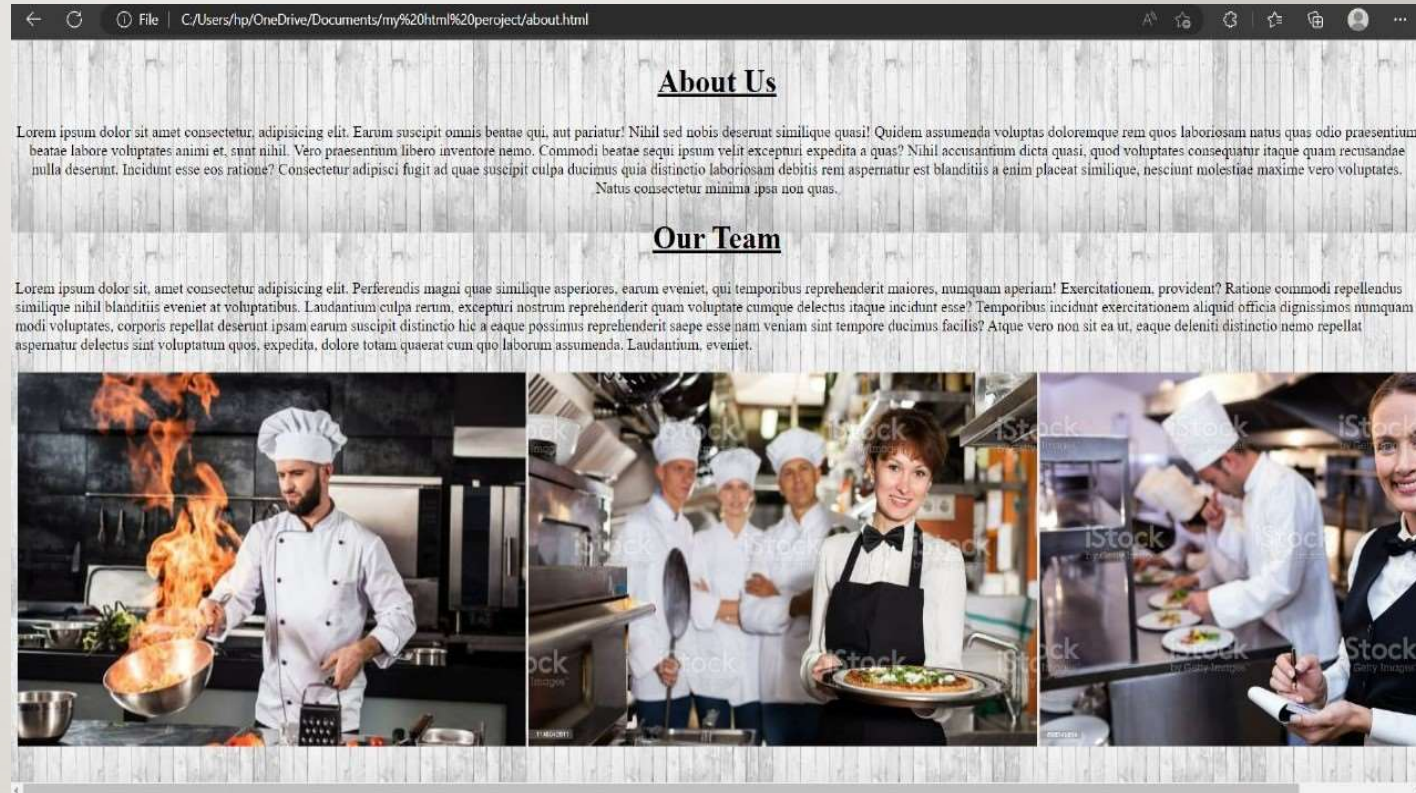

ABOUT US

- On clicking about us from home page it will redirect about us page (using anchor tag)

- <heading> tag is used most

- Background photo added by

```
body{
    background-image: url(pexelsforaboutus.jpg);
}
```

- Main photos added by img src tag

.container{
    height:730px;
    display:grid;
    grid-template-rows: repeat(3,1fr);
    grid-template-columns: repeat(3,1fr);
    row-gap: 12px ;
    column-gap: 12px ;
    justify-items: center;
}
```

FEEDBACK PAGE

- \<centre\>, \<br\> , \<div\>, \<label\> tag used most.

- For taking input from user \<input\> tag used.

```
<center>
    <form action="backend.php">
        <div>
            <h4>Name</h4>
            <label for="name"></label>
            <input type="text" name="myname" required autofocus id="name">
        </div>
        <div>
            <h4>Email</h4>
            <label for="email"></label>
            <input type="email" name="myemail" id="email">
        </div>
        <div>
            <h4>Phone Number</h4>
            <label for="phonenumber"></label>
            <input type="number" name="myphonenumber" id="phonenumber">
        </div>
        <div>
            <h4>Location you Visited:</h4>
            <label for="location"></label>
            <input type="text" name="mylocation" id="location">
        </div>
        <div>
            <h4>Day Visited</h4>
            <label for="dayvisited"></label>
            <input type="datetime-local" name="myvisitedday" id="dayvisited">
```

LOGIN PAGE

Most used tags:
- `<form>` tag
- `<span>` tag
- `<div>`
- `<input>` tag

```html
<div class="center">
    <h1>Login</h1>
    <form method="post">
        <div class="txt_field">
            <input type="text" required>
            <span></span>
            <label>Username</label>
        </div>
        <div class="txt_field">
            <input type="password" required>
            <span></span>
            <label>Password</label>
        </div>
        <div class="pass">Forgot Password?</div>
        <input type="submit" value="Login">
        <div class="signup_link">
            Not a member? <a href="#">Signup</a>
        </div>
    </form>
</div>
```
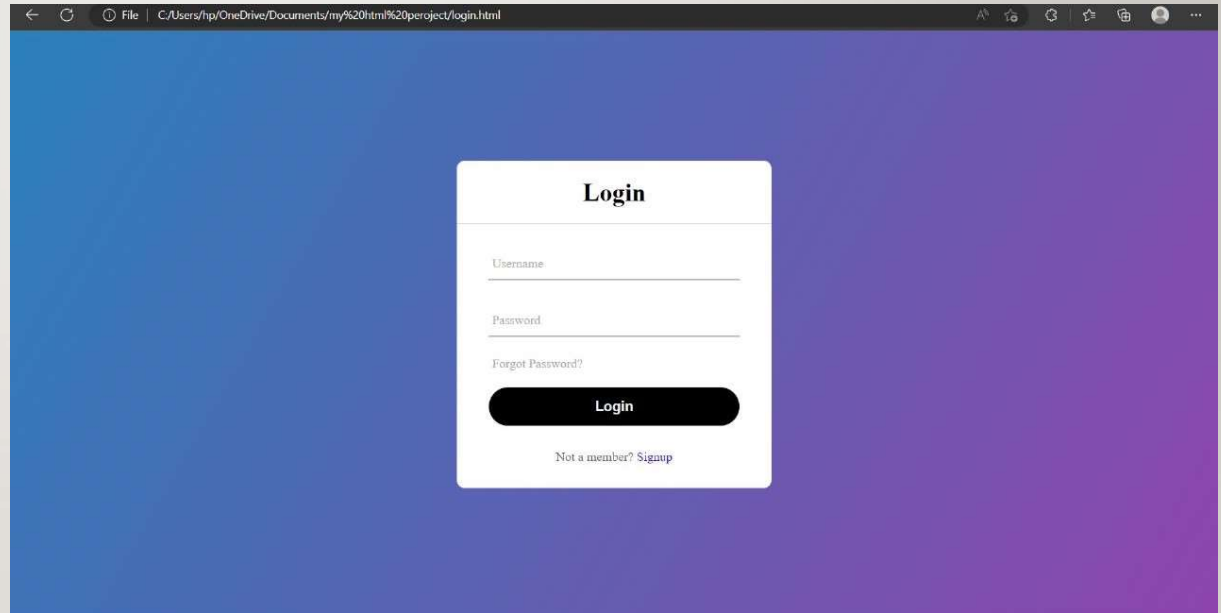

- We use id, class and elements like margin, padding, font-family, background(prt of css) to make webpage beautifull.

```css
body{
    margin: 0;
    padding: 0;
    font-family: montserrat;
    background: linear-gradient(120deg, ■#2980b9, ■#8e44ad);
    height: 100vh;
    overflow: hidden;
}
```

THANK YOU
